

KLUDI ZENTA SL

The new aesthetics

Almost 100 years ago

KLUDI began manufacturing bathroom fittings using traditional methods of craftsmanship. Followed by high-quality, reliable fixtures of timeless design, this expertise formed the foundation of KLUDI. From the tradition as a faucet specialist, the goal was created to combine the highest quality of use and perfect design in a unique way. Thus the claim Water in Perfection finds unmistakable expression in our products as well as in all services we provide for our customers.

It inspires and drives

our future activities.

The look of KLUDI ZENTA SL emanates from its form

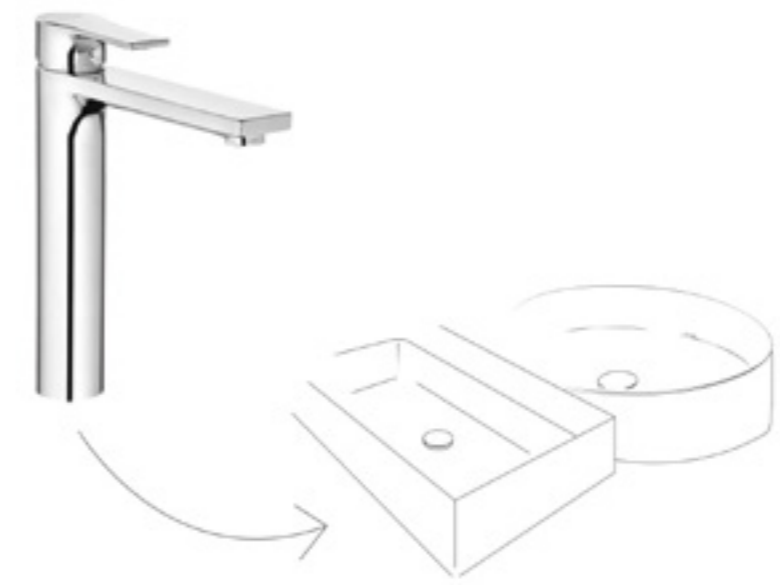

Detail

KLUDI ZENTA SL

The new aesthetics

When circles and rectangles merge, the result bears the name KLUDI ZENTA SL. The gentle meeting of fundamental geometrical forms creates a new, light look for washbasins, bathtubs and showers. Formally sophisticated down to the very last detail, ZENTA SL presents an archetypal fitting design with flowing transitions between the body, spout and lever.

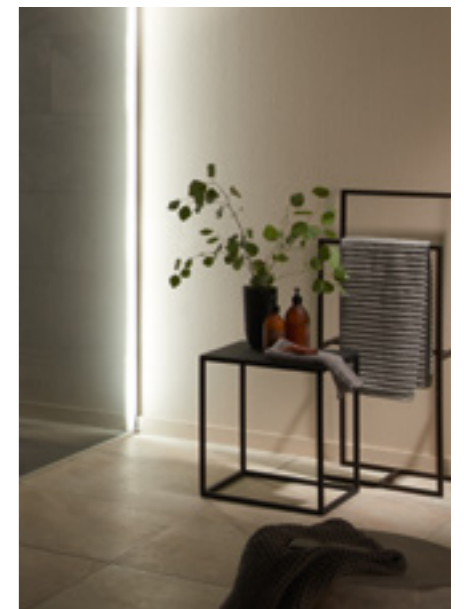

Elegant curves contrast with strict lines and emphasises their geometric clarity – a masterpiece of industrial manufacturing quality. Utmost precision and craftsmanship is required here to ensure that soft radii and precise edges harmonise with high-gloss surfaces. Hand-finished contours encased in tangibly smooth chrome bring joy with each use day after day, every time.

The streamlined and minimalist design language of the fitting series is inspired by delicate design, a new trend in bathroom design. Thanks to its elegant purism, visible above all in the flat silhouette of the spout, KLUDI ZENTA SL blends perfectly into every timeless urban décor.

The ZENTA SL line of fittings is part of the KLUDI Smart Luxury range, which epitomises outstanding design and top innovation. First-class bathroom fittings are expressed uniquely in inspiring styles.

Archetypal. Consistent, unbroken lines accompanied by soft transitions, the perfected contours are an expression of masterly manufacturing quality.

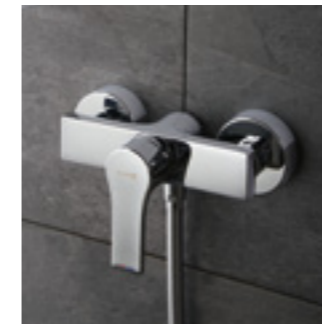

Trendy. The streamlined silhouette of the fitting line suits bathroom ceramics and furniture with a delicate character.

KLUDI ZENTA SL

Symbiosis at its most beautiful

VersatilityPlus

The recessed cartridge of the stylish shower fitting gives you more freedom to move while showering.

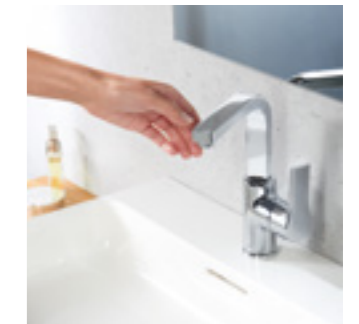

Gentle flow

Premium, limescale-repellent aerators make it easier to care for and ensure a gentle flow of water at all times.

Sustainable

The EcoPlus version with a spout height of 75 mm saves energy by reducing hot water consumption.

Perfect all-round

Solutions for every bathroom application and room size: The fitting with control elements at the side is cast in a single part and swivels.

Brilliant. Streamlined design without functional compromises. Utmost precision where edges meet surfaces. Outstanding KLUDI workmanship makes it possible.

Minimalism. A light look reduced to the essentials. Whether round, angular or soft shapes – KLUDI ZENTA SL completes the clear, minimalist look of modern living environments. Delicate bathroom ceramics combined with slimline furniture and accessories complement the puristic furnishing style.

Attention to Detail. Circles and rectangles are the dominant stylistic elements and create a classy overall impression. That is the result of the attention to detail that characterises every manufacturing step at KLUDI.

Allure. Cylindrical rosettes and cubic elements combined with style. The metal shower connection highlights the premium quality of the fitting line.

VersatilityPlus. The cartridge, the heart of a fitting, was set towards the back for the bathtub and shower fittings. That gives you more space, even in small spaces.
